Options price list will show any options for this particular product listed with the price.

Series or Category

Section

Sales of all goods are expressly conditioned upon the terms contained in seller's Terms and Conditions of Sale. Any different or additional terms found on your purchase order or other buyer form, whether pre-printed or otherwise are specifically excluded and are void.

CONDITIONS OF SALE

Shipping: For limitations on less than truckload quantities, contact Customer Service at 800.945.2726.

In case of billing discrepancies, contact customer service for adjustment. Debit memos and deductions from remittances are not acceptable.

Authorized returns subject to restocking charge; see return policy or contact Aquatic's Customer Service Center.

Prices and specifications subject to change without notice. Possession of this price list does not constitute an offer to sell.

WHIRLPOOLS

Options must be specified at time of order. Additional lead time may be required for factory installation of options.

All whirlpool baths are water tested and shipped complete with installed whirlpool plumbing system, pump motor, trim and pre-leveled base. Detailed installation procedures, operation/maintenance guide and warranties are packed with each unit.

Soakers are sold for bathtub use only. Field installation of a non-Aquatic whirlpool system to any Aquatic soaker voids all warranties and code listings.

Drain, waste and overflow outlets are factory-drilled unless otherwise noted at the time of order

For more detailed information on individual models, see catalogs, brochures and tech data sheets, or visit www.aquaticbath.com.

All prices, specifications and equipment are subject to change without notice.

All dimensions are nominal.

RETURN POLICY

1. Commercial/Freedomline product, special order and non-standard color products cannot be returned for any reason.
2. Standard stock items may be returned with prior approval, and are subject to a 50% restocking fee.
3. Items may only be returned via pre-approved Aquatic truck.

4. All returns must be in A-Grade quality condition, ready for resale, without needed repairs, clean and free of debris. Skirt packs, boxes, or other packaging must be in good order. All accessories must be present and in new condition.
5. An RMA must be filed within eight (8) weeks of original ship date. Goods for return authorized in advance by Aquatic.
6. Product is subject to inspection prior to credit reimbursement. Credit for goods returned under an RMA will be issued after all units are inspected at the factory and deemed to be in sellable condition. No credit will be issued on units deemed un-sellable. Signature from the driver/carrier receiving returned product does not constitute inspection of goods. If the Aquatic quality team determines in its reasonable discretion that the problem is due to customer or third party misuse, abuse or mishandling the customer will be so notified.
7. Any repair or packaging cost necessary to bring product to sellable condition may be deducted from any credit reimbursement. Customer Service will notify the customer of the disposition and credit value.
8. Aquatic reserves the right to deny any request to return product.
9. This return policy in no way deviates or supplements Aquatic's standard warranty terms. Aquatic warrants that its products will conform to our specifications and be free of defects in workmanship and material. All other warranties, express or implied, are disclaimed.

CANCELLATION POLICY

Order cancellations or changes for standard models are accepted within forty-eight (48) hours of receipt of order. Written confirmation of the cancellation or change must be given. No cancellations or changes may be made after forty-eight (48) hours. Aquatic is not responsible for errors made as a result of verbal communications not followed by written confirmation. An order for non-standard colors or modified units requiring special accessories or equipment cannot be cancelled.

FREIGHT INSPECTION

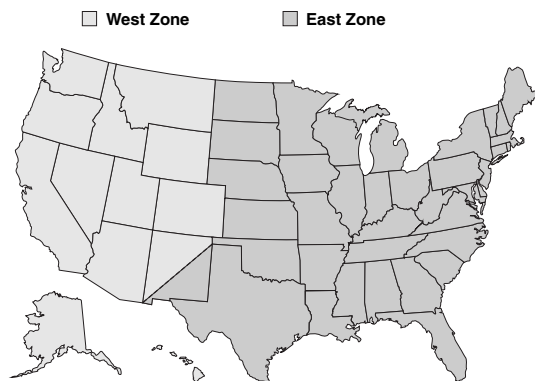

The following freight inspection requirements and instructions apply to all shipments of Aquatic products:

1. Freight inspection must be done at time of delivery.
2. Aquatic must be notified of any damage, discrepancies or missing items within 24 hours of delivery.
3. An RMA must be obtained prior to returning any item. Contact Customer Service immediately to obtain an RMA.

AREAS SERVED

Unless otherwise noted, all models listed in this price book are available nationally. Select models identified as “East Zone Only” or “West Zone Only” are available on a regional basis only. Reference the map below.

Select models identified as “PNW Zone Only” are available in Washington, Oregon, and Idaho only.

HOW TO SELECT THE APPROPRIATE BATH FIXTURE

Determine net dimensions by measuring the width of the area in your bathroom where the bath fixture will be installed.

Measure the depth (front of unit to back wall) of the area where the bath fixture will be installed to determine the exact size. Include a walkway of at least 21 inches in front of whirlpools.

Select a bath fixture that meets the measured dimensions.

For coordinating shower doors, see the door options listed in this price book (where applicable).

HOW TO ORDER

Include the following information on your purchase order and fax to Customer Service at 866.544.5353.

Model name/number

Color and trim

Drain location

Pump or blower location

Options

Quantity

Customer name and contact information

Purchase order number

Store information

Note: Any changes to an order after it has been processed are subject to delivery delays.

TECHNICAL INFORMATION

Technical information on all Aquatic products can be found at www.aquaticbath.com.

WARRANTY

See product warranty documents for detailed warranty information. Warranty documents are packed with each model, and are available for download at aquaticbath.com.

Aquatic is committed to helping contractors and designers with barrier-free residential and commercial installations by manufacturing bathing fixtures that are compliant with all major building codes. Aquatic makes a wide selection of products to meet all applications, including decorative bath fixtures that give you a more beautiful look while providing safety and security to the bather. Aquatic's lustrous premium cast acrylic and economical AcrylX™ applied acrylic barrier-free and assisted care models appeal to persons with disabilities as well as those who enjoy the peace of mind provided when grab bars, a seat or barrier-free entrance are needed while bathing. Aquatic complies with all federal bath fixture requirements. Aquatic assumes no responsibility for final code compliance. The information and specifications taken from this price book must be confirmed with appropriate authorities.

ADA CODES OVERVIEW

Americans with Disabilities Act (ADA) prohibits discrimination against disabled persons covering employment, transportation, public accommodations, activities of state and local government and telecommunications, including hotels and motels.

ADAAG — Americans with Disabilities Act-Accessible Guidelines (Federal Register 28 CFR part 36-1994 sections 4.20, 4.21 & 4.26)

- ADAAG are the applicable guidelines and standard specifications for building access as outlined by ADA. Whenever reference is made to ADA, ADAAG is equally applicable.
- ADAAG is required for compliance in all public buildings except those of state and local government projects, where the Uniform Federal Access Standard, commonly referred to as UFAS, may be selected in lieu of ADAAG.
- Also, a local or state code may "substitute" ADAAG in public accommodations, including hotels and motels and commercial facilities, if and only if the Department of Justice has certified that code as being equivalent or better than ADAAG, otherwise ADAAG applies to ALL buildings.

ADA/ANSI COMPLIANCE GUIDELINES

For ADA compliance, unit must have a slip resistant, textured bottom per ASTM F-462 and be fully equipped with grab bars, seat, a pressure balancing mixing valve, and a hand-held shower. 36" transfer showers require an L-shaped grab bar (1½" wall clearance) with L-shaped seat (17"–19" in height) and up to a ½" allowable curb. 60" roll-in showers require either an L-configured grab bar (1½" wall clearance) with L-shaped seat (17"–19" in height) or a U-configured grab bar (1½" wall clearance) with no seat. Tub/showers must have 4 grab bars and a removable seat (17"–19" in height). ANSI compliant units require the same features as an ADA unit with the addition of a vertical grab bar on transfer showers, roll-in showers, and tub-showers.

Thresholds

For models with a flat threshold, build up or recess the bathroom floor the height of the skirt less the thickness of the finished floor. For beveled thresholds, build up or recess the bathroom floor the height of the skirt less the thickness of the finished floor, ensuring that the finished floor meets the base of the bevel at the threshold.

It is recommended that the bathroom floor outside ADA clear floor space be designed with a floor drain to alleviate any water over spray that may escape the shower stall.

ACCESSIBILITY STANDARDS / CODE COMPLIANCE

The following standards provide technical design criteria/guidelines for accessibility for a tub or shower. Not all standards apply to every Aquatic accessible bath fixture. See model description for specific code compliance.

- ADAAG — Americans Disabilities Act Accessibility Guidelines (Federal Code of Regulations 28 CFR Part 36, sections 4.20 & 4.26, September 2002)
- ADA/ABA — Americans with Disabilities Act / Architectural Barriers Act (Accessibility Guidelines, September 2010)
- ICC/ANSI — International Code Council / American National Standards Institute (A117.1-2009: Accessible and Usable Buildings and Facilities)
- UFAS — Uniform Federal Accessibility Standards
- FFHA — Federal Fair Housing Act (FHA Design Manual)
- CSA — Canadian Standards Association (CAN/CSA-B651-04: Accessible design for the built environment)
- Cal Title 24 — California Building Standards Code (California Code of Regulations, Title 24)
- TAS — Texas Accessibility Standards, March 2012
- 521 CMR — Code of Massachusetts Regulations
- MSHDA — Michigan State Housing Development Authority (Standards of Design)

TESTING / MATERIAL SPECIFICATIONS

Products meet or exceed requirements of applicable sections of IAPMO Z124-2017, CSA B45, ASME A112.19.7, CSA C22.2 and UL 1795, including but not limited to:

Loads on rim and bottom of bathtubs, and on threshold and bottom showers

- Load test with 300 (+/-5) lbs weight
- Deflection of applied load: 0.150" (3.81 mm) or under
- Maximum residual deflection of tub or shower bottom 10 minutes after removal of load: 0.008" (0.203 mm)

Drain fitting connection

- Load test with 50 (+/-1) lbs weight, placed for one minute in each of three radial position.

Ignition Test

- Maximum allowable burning time is 30 seconds.

Note: Reference to laboratory tests and ratings does not imply that Aquatic bath fixtures will not burn. All AcrylX™ applied acrylic units can burn, especially in a full-scale fire. Once ignited, they may burn rapidly, releasing dense smoke. Therefore, proper precautions must be taken.
